

Heriyadi

Senior Frontend Engineer

Yogyakarta, Indonesia | 085217377212 | heriyadisst@gmail.com | linkedin.com/in/heriheriyadi

Summary

Senior Frontend Engineer experienced in building scalable web and mobile applications across fintech, e-commerce, and merchant platforms. Skilled in React.js, Typescript, Golang and Flutter, with strong expertise in frontend architecture, performance optimization, and product-focused development. Contributed to merchant platform development at Grab supporting operations across Southeast Asia.

Experience

Senior Fullstack and Frontend Engineer — Grab (2018–2025)

- Delivered production features for merchant management and onboarding systems used by millions of merchants.
- Designed and implemented merchant onboarding web-mobile platforms enabling merchants to register and manage business accounts.
- Improved web performance by reducing page load time by up to 40%.
- Built scalable frontend systems using React.js, TypeScript, and modular component architecture.
- Collaborated with product managers, designers, backend engineers, and QA teams to deliver production features.
- Improved platform stability through performance optimization and continuous refactoring.

Founder & Developer — Own Company 2025 – *Present*

- Building innovative products focused on solving real-world problems using modern web technologies

Software Engineer — PT Kudo Teknologi Indonesia (2016–2017)

- Developed the Kudo Finance Portal for financial reconciliation and internal finance operations.
- Improved financial reporting workflows and operational efficiency.
- Automated operational processes reducing manual reconciliation tasks.

Web Developer — WEBARQ (2014–2016)

- Developed enterprise websites, e-commerce platforms, and custom web portals.
- Built scalable applications using PHP and Laravel.

PHP Programmer — PT Natasolusi Pratama (2011–2014)

- Maintained and enhanced the Kejaksaan Agung legal information portal.
- Developed new features supporting public legal information services.
