SUMMARY

Senior Frontend Engineer with expertise in building scalable web and mobile applications. At Grab, built merchant platforms serving millions of merchants across Southeast Asia. Specialized in React, TypeScript, performance optimization, and frontend architecture. Currently building innovative solutions through my own company.

EXPERIENCE

Senior Frontend Engineer — Grab

2018 – 2025

- Built merchant management and onboarding platforms serving millions of merchants across Southeast Asia, enabling businesses to register, manage accounts, and access financial services
- Architected scalable frontend systems using React.js and TypeScript with modular component architecture, enabling 4+ teams to work in parallel
- Optimized web performance by reducing page load time by 40% through code splitting, lazy loading, and bundle optimization
- Improved platform stability and user experience through continuous performance optimization and strategic refactoring
- Collaborated across product, design, backend, and QA teams to deliver production features with high quality and reliability

Founder & Developer — Own Company

2025 – Present

- Building innovative products focused on solving real-world problems using modern web technologies

Software Engineer — PT Kudo Teknologi Indonesia

2016 – 2017

- Developed Kudo Finance Portal for financial reconciliation and internal operations
- Automated operational processes reducing manual reconciliation tasks and improving workflow efficiency

Web Developer — WEBARQ

2014 – 2016

- Developed enterprise websites, e-commerce platforms, and custom web portals for diverse clients
- Built scalable applications using PHP and Laravel framework

PHP Programmer — PT Natasolusi Pratama

2011 – 2014

- Maintained and enhanced the Kejaksaan Agung legal information portal serving public users
- Developed new features supporting public legal information services
